- IO
- Operating System

## HOW ONDATAPERF REPORT?

- When needed punctually on a well-defined activity stretch of time or automatically to monitor the database performance which occur and allow you to have daily or monthly historical performance reporting in HTML or PDF format.

- It makes finely and top-down analysis of the response time of the oracle database. The identification of the bottlenecks is immediate in a few seconds, and is represented by charts with traffic lights, comments and solutions.
